OnTrack - your guarantee for success

OnTrack uses easy to understand financial software to provide you with a critical financial analysis of your business. Australia's major banks have adopted this very safe software to process and approve business finance applications.

Aside from helping you to identify and meet the banks' 'hidden criteria' for finance applications, OnTrack can pinpoint key drivers to business success – even for businesses running at a loss.

What is OnTrack?

OnTrack is an excellent diagnostic tool to conduct a 'health check' of your current and future finances. It allows us to diagnose your business and offer recommendations and solutions to potential tax problems or cashflow and profit issues while maintaining a focus on overall efficiencies and performance.

"The cost of OnTrack is far outweighed by the benefit my business has received. The money back guarantee was not even an issue" Matthew Seeliger.

"I've been wanting this kind of service from my accountant for years!" Karen Foster

What can OnTrack do for me?

OnTrack will assist you to:

- Uncover possible causes of current financial difficulties
- Plot future directions and set goals
- Create projections through a series of 'what if...?' scenarios
- Help you avoid potential pitfalls before you reach them
- Create positive cashflow
- Identify areas for greater efficiencies.

"Having an accountant that helps me grow my business as well as minimise tax is sensational" Chris Mullins

Will it take long?

You'll need to allow about two hours to enable us to conduct our review and discuss strategic recommendations. The OnTrack review can take place in your office or ours.

You will receive a professional OnTrack report soon after your review. In plain English, this report outlines the initial analysis and scenarios. These can prove invaluable when monitoring your performance improvements over the coming months and years.

"OnTrack is the best program I have ever come across. Knowing the impact of every financial business decision before I make it makes everything easier" Ben Acott

What do I need to provide to get back OnTrack?

The review will draw on your detailed Balance Sheet and Profit & Loss reports for the past financial year and the current year to date. It's important that these figures are as accurate and complete as possible.

If you use any MYOB package, your full data file will be perfect!

What will it cost to get OnTrack?

OnTrack can provide you with as much or as little as you want or need. As every business has different needs, OnTrack offers three packages you can select from. Our guarantee for success ensures that there is no risk to you. If the in-depth analysis and recommendations do not result in improvements for your business, we'll simply refund your fees. No questions asked.

For a complimentary, obligation free consultation about the benefits and costs of OnTrack, contact us today.

"OnTrack helps me understand my financial statements so much better. I can now see the areas of my business I need to improve" Malcolm MacDowall

Can my own accountant help me get OnTrack?

Many accountants are so bogged down with tax and compliance work that they either don't have the time or the resources to provide such a thorough and detailed review of your business. OnTrack is the result of a substantial investment in specialised software, as well as sound professional knowledge of complex accounting ratios and acute business analytical skills.

As a qualified accountant and business advisor, I consider OnTrack to be a mandatory addition to any business planning, including tax!
